

BioMin® F shows higher degree of effectiveness in reducing dentine hypersensitivity in clinical trial

S. ASHWINI, K. SWATIKA, D. N. KAMALA

CONTEMP CLIN DENT 2018;9:330 6

Method

A total of **60 participants** suffering from **subjective and thermal sensitivity** in at least two teeth were randomly allocated to one of the following dentifrices:

Group A 5% fluorocalcium phosphosilicate (BioMin® F) **Group B** 5% calcium sodium phosphosilicate (NovaMin™*) **Group C** Standard dentifrice containing fluoride

Sensitivity scores (VAS) were measured at baseline, immediately after scaling and root planning, at 15, 30, and at 60 days.

Conclusion

BioMin® F showed **better results than NovaMin™**, performing top in the study.

BioMin® F demonstrated the **highest degree of effectiveness** in reducing dentine hypersensitivity.
