

BioMin® F clinically proven to be more effective than NovaMin™ in the treatment of dentinal hypersensitivity

HUDA HUSSAIN, SUHAIL MAJID JAN, ROOBAL BEHAL

INTERNATIONAL JOURNAL OF MEDICAL AND BIOMEDICAL STUDIES VOLUME 3, ISSUE 5; MAY: 2019; PAGE NO. 146-150

Method

A total of **60 patients** were randomly prescribed three dentifrices after **oral prophylaxis**:

Group A 5% fluorocalcium phosphosilicate (BioMin® F)

Group B 5% calcium sodium phosphosilicate (NovaMin™*)

Group C Standard dentifrice containing fluoride

Subjective and thermal sensitivity was assessed using a 10-point VAS score at baseline, 15 days, 30 days and 60 days of treatment.

Conclusion

BioMin® F outperforms NovaMin™ and was the **most effective agent** in reducing the VAS score.

BioMin® F is an **effective agent** for the **clinical management** of **dentinal hypersensitivity**.

BioMin® F resulted in **better tubular occlusion** than **NovaMin™**.
